

# INSTALL GUIDE

To install TarsDelivery you need to follow these steps:

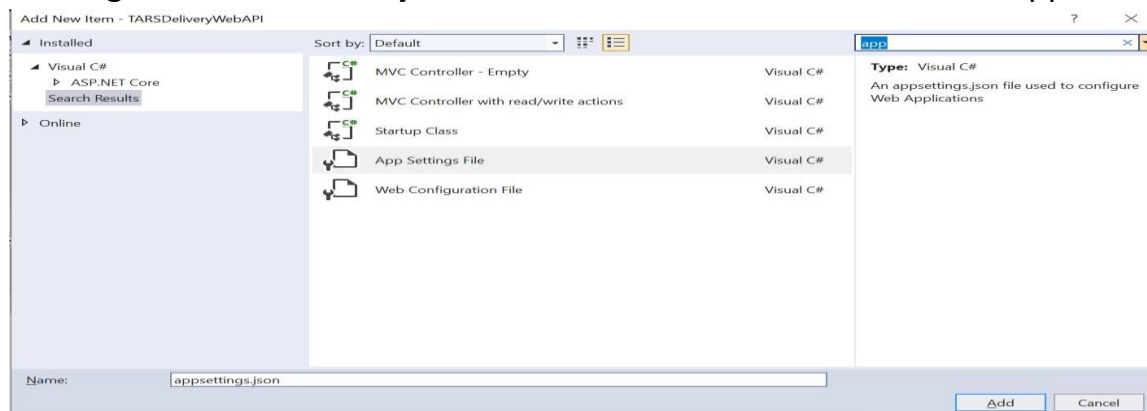

**Step 1:** Click to link <https://github.com/tachi098/TARSDelivery> to download source code.

**Step 2:** In SQL Server you need to create database with name **TARSDeliveryDB**

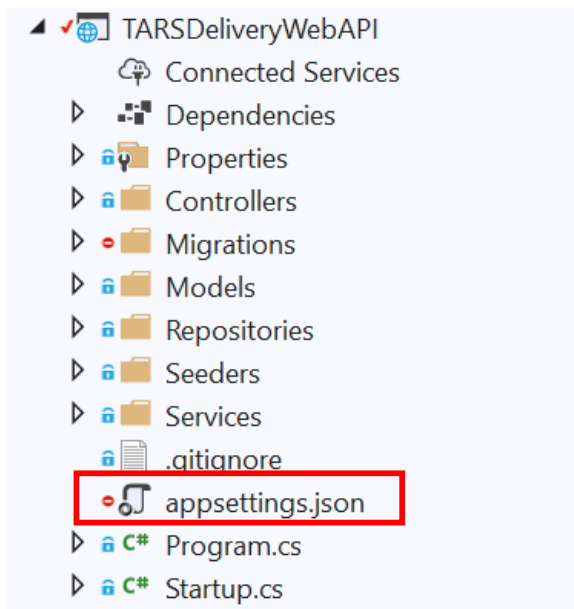

**Step 3:** In **TARSDeliveryWebAPI** you need to add file **appsettings.json**

Click right to **TARSDeliveryWebAPI** -> Add -> New Item... choose App Settings File

Then you copy all code below to **appsettings.json** and enter your connection string

```
{
  "Logging": {
    "LogLevel": {
      "Default": "Information",
      "Microsoft": "Warning",
      "Microsoft.Hosting.Lifetime": "Information"
    }
  },
  "AllowedHosts": "*",
  "ConnectionStrings": {
    "ApplicationContext": "<Connection String>"
  }
}
```

Next, you open Package Manager Console and continue with step 4, step 5

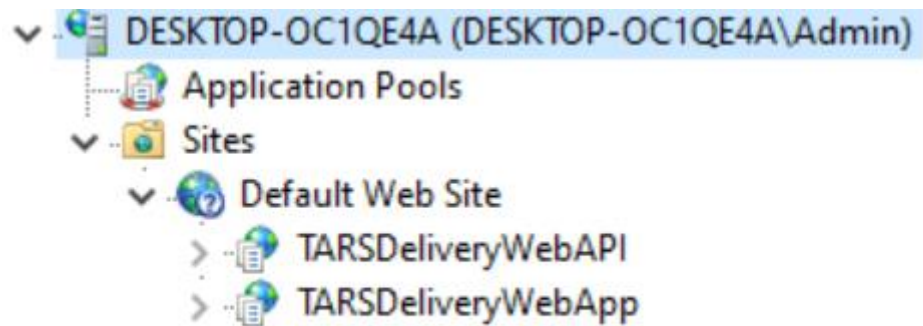

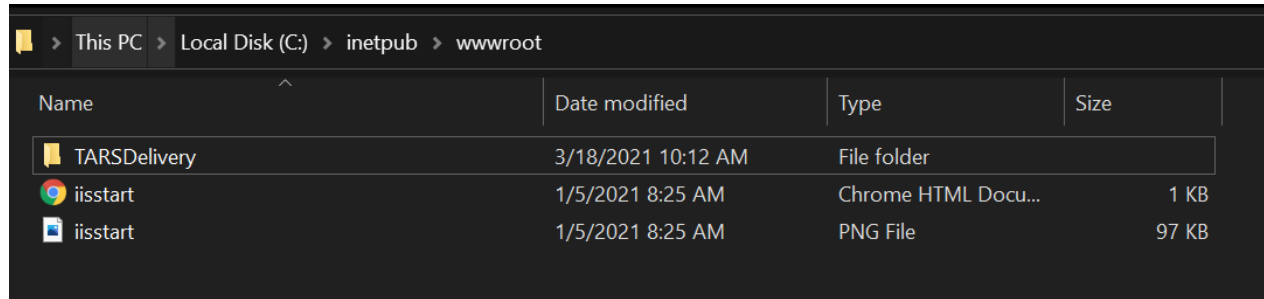

#### **Step 4: Add migration**

```
add-migration Initial
```

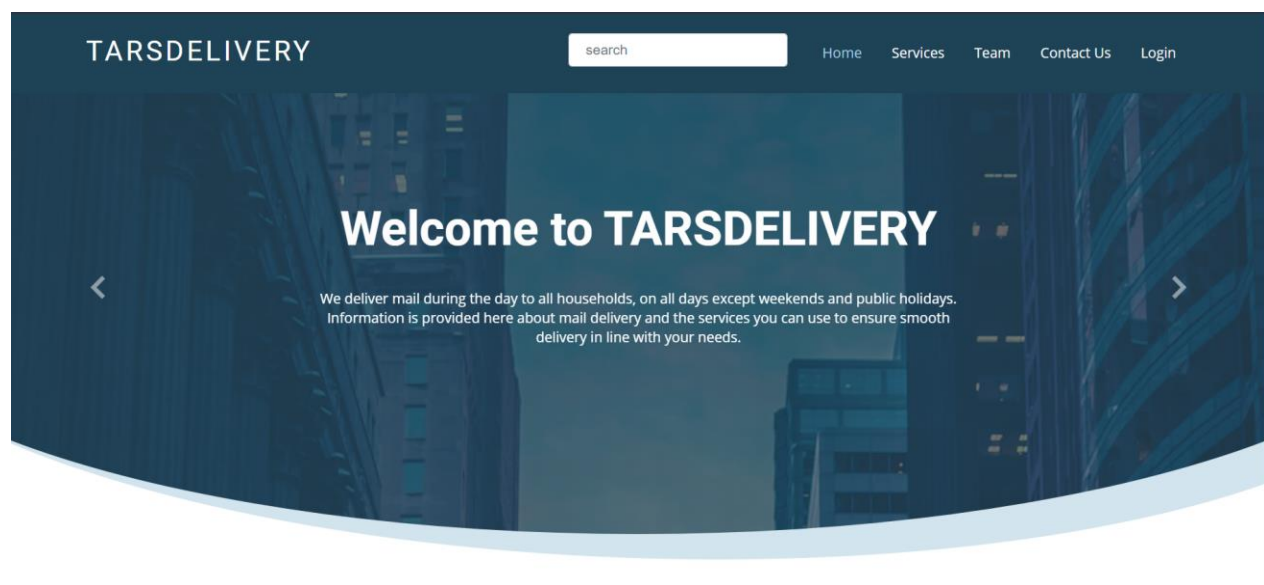

#### **Step 5: Update database**

```
update-database
```

## Step 6: Deploy project to IIS

When publish **TARSDeliveryWebAPI** and **TARSDeliveryWebApp** open browser and enter to url **localhost**

**Notice:** You must run two modules **TARSDeliveryWebAPI** and **TARSDeliveryWebApp** same time
